Clubclass Residential Language School has teamed up with one of the leading providers of e-learning solutions to provide students with a customised online learning system and information portal. Through this portal students can prepare for their course before they arrive, get extra practice throughout their course period and maintain acquired skills after their departure. A personal study plan adapts to the pace and capability of individuals and lessons expose students to a range of relevant and authentic online material. Students can also make use of the e-Reception facility which will allow them to get to know what's happening at Clubclass and in Malta, look up schoolmates, view or add pictures to the school photo album, look up information about the local area and the school and complete administrative forms and letter requests.

## **AIMS AND BENEFITS OF CLUBCLASS E-LEARNING**

Clubclass e-learning provides an online, managed learning environment to help students get the most from their time at school. Its main aims are to:

### **Enhance the learning experience**

Students may use the online learning as a preparatory and support tool. There will be times when students need extra help, access to supplementary learning sessions or want to study on their own. Clubclass e-learning will direct them to the right material and give them access to the right lessons whenever they want and wherever they happen to be. The portal will therefore:

- ✓ Expose students to authentic and relevant source material with access to weekly lessons.
- ✓ Tailor lessons to students' needs and help them maintain what they've learned in the course.

### **Offer an integrated learning approach**

Other online learning systems are categorical, meaning that the student looks up a topic and gets a list of activities. The Clubclass e-learning system is integrated with the result being a more autonomous learning environment enabling pre- and post-sessional applications.

### **Enable students to make the most of their stay**

Through the calendar system the e-learning portal enables students to keep track of the activities taking place, sign-up for these activities and manage their learning time more effectively.

### **Encourage social networking**

The system also allows for integration and networking between schoolmates. Students can find out who is attending events, contact their schoolmates and keep in touch after their stay.

### **Assist in providing key information**

Through the e-Reception section students can obtain information about the school and the local areas as well as access and complete administration forms.

The Clubclass e-learning portal will be available **FREE OF CHARGE** from 1st January 2012. All adult students who register for a course will be able to access the portal immediately until 3 months after their course finishes.
